78153 Le Chesnay Cedex
France

Phone: +33 1 39 63 58 01

Biography

I have been working for INRIA-Paris as a R&D Engineer since September, 2009. Previously I worked for SAP as a Research Associate. My research interest is SOA-based workflow technologies like BPM (Business Process Management), ESB (Enterprise Service Bus) and SCA (Service Component Architecture).

Currently I am working for INRIA in a French ANR project ITEMIS (<http://itemis-anr.org/>). My current work is on modeling and designing an architecture to enable business workflow applications to execute in an integrated environment of IT and embedded systems.
