Biography

I received my PhD in Computer Science Engineering and my MSc in Electronic Engineering from the University of Bologna. During my PhD I visited Nokia Research Center in Cambridge (USA) and the University of Napoli Federico II.

Before joining INRIA I was a post-doc researcher at the Department of Electronics, Computer Science and Systems (DEIS) of the University of Bologna, where I was involved in the EU ARTEMIS SP3 Smart Objects for Intelligent Applications ([SOFIA](#)) project.

Research Interests

My research is currently focused on the design and development of [middleware for mobile social ecosystems](#).

My background includes designing and developing semantic-based middleware to support context-aware applications in pervasive environments (PhD topic), as well as developing smart space applications based on information interoperability ([SOFIA](#)).

Publications

For a list of my previous publications, please check my [webpage](#) at the University of Bologna.
