Contents

Part I. Keynote

Complexity Questions in Non-Uniform Random Variate Generation ................................................... 3  
Luc Devroye

Computational Statistics Solutions for Molecular Biomedical Research: A Challenge and Chance for Both ................. 19  
Lutz Edler, Christina Wunder, Wiebke Werft, Axel Benner

The Laws of Coincidence .................................... 33  
David J. Hand

Part II. ABC Methods for Genetic Data

Choosing the Summary Statistics and the Acceptance Rate in Approximate Bayesian Computation .......................... 47  
Michael G.B. Blum

Integrating Approximate Bayesian Computation with Complex Agent-Based Models for Cancer Research ............... 57  
Andrea Sottoriva, Simon Tavaré

Part III. Algorithms for Robust Statistics

Robust Model Selection with LARS Based on S-estimators ... 69  
Claudio Agostinelli, Matias Salibian-Barrera

Robust Multivariate Methods for Compositional Data .......... 79  
Peter Filzmoser, Karel Hron

Detecting Multivariate Outliers Using Projection Pursuit with Particle Swarm Optimization ............................ 89  
Anne Ruiz-Gazen, Souad Larabi Marie-Sainte, Alain Berro

Part IV. Brain Imaging

Imaging Genetics: Bio-Informatics and Bio-Statistics Challenges 101  
Jean-Baptiste Poline, Christophe Lalanne, Arthur Tenenhaus, Edouard Duchesnay, Bertrand Thirion, Vincent Frouin
Part V. Computational Econometrics

Bootstrap Prediction in Unobserved Component Models ...... 123
Alejandro F. Rodríguez, Esther Ruiz

Part VI. Computer-Intensive Actuarial Methods

A Numerical Approach to Ruin Models with Excess of Loss Reinsurance and Reinstatements ..................... 135
Hansjörg Albrecher, Sandra Haas

Computation of the Aggregate Claim Amount Distribution Using R and Actuar .................................. 145
Vincent Goulet

Applications of Multilevel Structured Additive Regression Models to Insurance Data ......................... 155
Stefan Lang, Nikolaus Umlauf

Part VII. Data Stream Mining

Temporally-Adaptive Linear Classification for Handling Population Drift in Credit Scoring ...................... 167
Niall M. Adams, Dimitris K. Tasoulis, Christofo...
Empirical Dynamics and Functional Data Analysis

Hans-Georg Müller

Part IX. Kernel Methods

Indefinite Kernel Discriminant Analysis
Bernard Haasdonk, Elżbieta Pękalska

Data Dependent Priors in PAC-Bayes Bounds
John Shawe-Taylor, Emilio Parrado-Hernández, Amiran Ambroladze

Part X. Monte Carlo Methods in System Safety, Reliability and Risk Analysis

Some Algorithms to Fit some Reliability Mixture Models under Censoring
Laurent Bordes, Didier Chauveau

Computational and Monte-Carlo Aspects of Systems for Monitoring Reliability Data
Emmanuel Yashchin

Part XI. Optimization Heuristics in Statistical Modelling

Evolutionary Computation for Modelling and Optimization in Finance
Sandra Paterlini

Part XII. Spatial Statistics / Spatial Epidemiology

Examining the Association between Deprivation Profiles and Air Pollution in Greater London using Bayesian Dirichlet Process Mixture Models
John Molitor, Léa Fortunato, Nuoo-Ting Molitor, Sylvia Richardson

Assessing the Association between Environmental Exposures and Human Health
Linda J. Young, Carol A. Gotway, Kenneth K. Lopiano, Greg Kearney, Chris DuClos

Multiblock Method for Categorical Variables .................. 389
   Stéphanie Bougeard, El Mostafa Qannari, Claire Chauvin

A Flexible IRT Model for Health Questionnaire: an Application to HRQoL .......................................................... 397
   Serena Broccoli, Giulia Cavrini

Multidimensional Exploratory Analysis of a Structural Model
Using a Class of Generalized Covariance Criteria ............... 405
   Xavier Bry, Thomas Verron, Patrick Redont

Semiparametric Models with Functional Responses in a Model
Assisted Survey Sampling Setting : Model Assisted Estimation
of Electricity Consumption Curves ................................. 413
   Hervé Cardot, Alain Dessertaine, Etienne Josserand

Stochastic Approximation for Multivariate and Functional Median .......................................................... 421
   Hervé Cardot, Peggy Cénac, Mohamed Chaouch

A Markov Switching Re-evaluation of Event-Study Methodology .......................................................... 429
   Rosella Castellano, Luisa Scaccia

Evaluation of DNA Mixtures Accounting for Sampling Variability ............................................................................ 437
   Yuk-Ka Chung, Yue-Qing Hu, De-Gang Zhu, Wing K. Fung

Monotone Graphical Multivariate Markov Chains ............... 445
   Roberto Colombi, Sabrina Giordano

Using Functional Data to Simulate a Stochastic Process via a Random Multiplicative Cascade Model ..................... 453
   G. Damiana Costanzo, S. De Bartolo, F. Dell’ Accio, G. Trombetta

A Clusterwise Center and Range Regression Model for Interval-Valued Data .......................................................... 461
   Francisco de A. T. de Carvalho, Gilbert Saporta, Danilo N.
   Queiroz

Contributions to Bayesian Structural Equation Modeling ...... 469
   Séverine Demeyer, Nicolas Fischer, Gilbert Saporta

Some Examples of Statistical Computing in France During the 19th Century .......................................................... 477
   Antoine de Falguerolles
Imputation by Gaussian Copula Model with an Application to Incomplete Customer Satisfaction Data ........................................ 485
Meelis Käärik, Ene Käärik

On Multiple-Case Diagnostics in Linear Subspace Method .... 493
Kuniyoshi Hayashi, Hiroyuki Minami and Masahiro Mizuta

Fourier Methods for Sequential Change Point Analysis in Autoregressive Models ............................................... 501
Marie Hušková, Claudia Kirch, Simos G. Meintanis

Computational Treatment of the Error Distribution in Nonparametric Regression with Right-Censored and Selection-Biased Data .......................................................... 509
Géraldine Laurent, Cédric Heuchenne

Mixtures of Weighted Distance-Based Models for Ranking Data .......................................................... 517
Paul H. Lee, Philip L. H. Yu

Fourier Analysis and Swarm Intelligence for Stochastic Optimization of Discrete Functions .................. 525
Jin Rou New, Eldin Wee Chuan Lim

Global Hypothesis Test to Simultaneously Compare the Predictive Values of Two Binary Diagnostic Tests in Paired Designs: a Simulation Study ........................................... 533
J. A. Roldán Nofuentes, J. D. Luna del Castillo, M. A. Montero Alonso

Modeling Operational Risk: Estimation and Effects of Dependencies .................................................... 541
Stefan Mittnik, Sandra Paterlini, Tina Yener

Learning Hierarchical Bayesian Networks for Genome-Wide Association Studies ........................................... 549
Raphaël Mourad, Christine Sinoquet, Philippe Leray

Posterior Distribution over the Segmentation Space ............. 557
G. Rigail, E. Lebarbier, S. Robin

Parcellation Schemes and Statistical Tests to Detect Active Regions on the Cortical Surface .................. 565
Bertrand Thirion, Alan Tucholka, Jean-Baptiste Poline
Robust Principal Component Analysis Based on Pairwise Correlation Estimators .................................................. 573
  Stefan Van Aelst, Ellen Vandervieren, Gert Willems

Ordinary Least Squares for Histogram Data Based on Wasserstein Distance ...................................................... 581
  Rosanna Verde, Antonio Irpinio

DetMCD in a Calibration Framework ........................................... 589
  Tim Verdonck, Mia Hubert, Peter J. Rousseeuw

Separable Two-Dimensional Linear Discriminant Analysis .... 597
  Jianhua Zhao, Philip L.H. Yu, Shulan Li

List of Supplementary Contributed Papers Only Available on springerlink.com ........................................... 605

Author and Keyword Index ..................................................... 617

Part XVII. Supplementary Contributed Papers

Clustering of Waveforms-Data Based on FPCA Direction ...... 625
  Giada Adelfio, Marcello Chiodi, Antonino D’Alessandro, Dario Luzio

Symbolic Data Analysis of Complex Data: Application to nuclear power plant ..................................................... 633
  Filipe Afonso, Edwin Diday, Norbert Badez, Yves Genest

Different P-spline Approaches for Smoothed Functional Principal Component Analysis ..................................... 641
  Ana M. Aguilera, M. Carmen Aguilera-Morillo, Manuel Escabias, Mariano J. Valderrama

Peak Detection in Mass Spectrometry Data Using Sparse Coding ................................................................. 649
  Theodore Alexandrov, Klaus Steinhorst, Oliver Keszöcze, Stefan Schikfler

A Comparison between Beale Test and Some Heuristic Criteria to Establish Clusters Number ......................... 657
  Angela Alibrandi, Massimiliano Giacalone

Estimating Population Proportions in Presence of Missing Data665
  Encarnación Álvarez-Verdejo, Antonio Arcos, Silvia González,
  Juan Francisco Muñoz, Maria Rueda
Sub-Quadratic Markov Tree Mixture Models for Probability Density Estimation ........................................... 673
Sourour Ammar, Philippe Leray, Louis Wehenkel

Data Management in Symbolic Data Analysis ............... 681
Teh Amouh, Monique Noirhomme-Fraiture, Benoit Macq

Variable Selection for Semi-Functional Partial Linear Regression Models .................................................. 689
Germán Aneiros, Frédéric Ferraty, Philippe Vieu

Clustering Functional Data Using Wavelets ................... 697
Anestis Antoniadis, Xavier Brossat, Jairo Cugliari, Jean-Michel Poggi

Polynomial Methods in Time Series Analysis ............... 705
Félix Aparicio-Pérez

Cointegrated Lee-Carter Mortality Forecasting Method ...... 713
Josef Arlt, Markéta Arltová, Milan Bašta, Jitka Langhamrová

Empirical Analysis of the Climatic and Social-Economic Factors influence on the Suicide Development in the Czech Republic ............................................................. 721
Markéta Arltová, Jitka Langhamrová, Jana Langhamrová

Yield Curve Predictability, Regimes, and Macroeconomic Information: A Data-Driven Approach .................... 729
Francesco Audrino, Kameliya Filipova

Socioeconomic Factors in Circulatory System Mortality in Europe: A Multilevel Analysis of Twenty Countries .......... 737
Sara Balduzzi, Lucio Balzani, Matteo Di Maso, Chiara Lambertini, Elena Toschi

Comparing ORF Length in DNA Code Observed in Sixteen Yeast Chromosomes ..................................... 745
Anna Bartkowiak, Adam Szustalewicz

Influence of the Calibration Weights on Results Obtained from Czech SILC Data .................................... 753
Jitka Bartosová, Vladislav Bína

Continuous Wavelet Transform and the Annual Cycle in Temperature and the Number of Deaths ..................... 761
Milan Bašta, Josef Arlt, Markéta Arltová, Karel Helman
EM-Like Algorithms for Nonparametric Estimation in Multivariate Mixtures .............................................. 769
Tatiana Benaglia, Didier Chauveau, David R. Hunter

On the use of Weighted Regression in Conjoint Analysis ....... 777
Salwa Benammon, Besma Souissi, Gilbert Saporta

Wavelet-PLS Regression: Application to Oil Production Data. 785
Salwa Benammon, Kacem Zied, Hedi Kortas, Dhifaoui Zouhaier

Variable Selection and Parameter Tuning in High-Dimensional Prediction ............................................. 793
Christoph Bernau, Anne-Laure Boulesteix

A Generative Model for Rank Data Based on Sorting Algorithm 801
Christophe Biernacki, Julien Jacques

“Made in Italy” Firms Competitiveness: A Multilevel Longitudinal Model on Export Performance ................. 809
Matilde Bini, Margherita Velucchi

Statistical Inference on Large Contingency Tables: Convergence, Testability, Stability .......................... 817
Marianna Bolla

A Class of Multivariate Type I Generalized Logistic Distributions .......................................................... 825
Salvatore Bologna

Adaptive Mixture Discriminant Analysis for Supervised Learning with Unobserved Classes ...................... 831
Charles Bouveyron

Forecasting a Compound Cox Process by means of PCP ...... 839
Paula R. Bouzas, Nuria Ruiz-Fuentes, Juan Eloy Ruiz-Castro

Cutting the Dendrogram through Permutation Tests ........ 847
Dario Bruzese, Domenico Vistocco

Design of Least-Squares Quadratic Estimators Based on Covariances from Interrupted Observations Transmitted by Different Sensors .......................................................... 855
R. Caballero-Aguila, A. Hermosa-Carazo, J. Linares-Pérez

Pseudo-Bayes Factors ............................................ 863
Stefano Cabras, Walter Racugno, Laura Ventura
Diagnostic Checking of Multivariate Normality Under Contamination ...................................................... 871
   Andrea Cerioli

On Computationally Complex Instances of the c-optimal Experimental Design Problem: Breaking RSA-based Cryptography via c-optimal Designs ...................................................... 879
   Michal Černý, Milan Hladík, Veronika Skočdopolová

Estimation and Detection of Outliers and Patches in Nonlinear Time Series Models .................................... 887
   Ping Chen

Two-way Classification of a Table with non-negative entries: Validation of an Approach based on Correspondence Analysis and Information Criteria ........................................ 895
   Antonio Ciampi, Alina Dyachenko, Yves Lechevallier

A Mann-Whitney Spatial Scan Statistic for Continuous Data .......................................................... 903
   Lionel Cucala

Quantile Regression for Group Effect Analysis .......................................................... 911
   Cristina Davino, Domenico Vistocco

Regularized Directions of Maximal Outlyingness .......................................................... 919
   Michiel Debruyne

A New Approach to Robust Clustering in $\mathbb{R}^p$ .......................................................... 927
   Catherine Dehon, Kaveh Vakili

An Exploratory Segmentation Method for Time Series .......................................................... 935
   Christian Derquenne

Using Auxiliary Information Under a Generic Sampling Design .............................................. 943
   Giancarlo Diana, Pier Francesco Perri

Improving Overlapping Clusters obtained by a Pyramidal Clustering .................................................. 951
   Edwin Diday, Francisco de A. T. de Carvalho, Luciano D.S. Pacifico

Visualizing and Forecasting Complex Time Series: Beanplot Time Series .................................................. 959
   Carlo Drago, Germana Scepi

M-estimation in INARCH Models with a Special Focus on Small Means .................................................. 967
   Hanan El-Saied, Roland Fried
Score Moment Estimators .............................................. 975
Zdeněk Fabián

Testing the Number of Components in Poisson Mixture Regression Models .............................................. 983
Susana Faria, Fátima Gonçalves

Support Vector Machines for Large Scale Text Mining in R . . 991
Ingo Feinerer, Alexandros Karatzoglou

Computation of the Projection of the Inhabitants of the Czech Republic by sex, age and the highest education level ........ 999
Tomáš Fiala, Jitka Langhamrová

Two Kurtosis Measures in a Simulation Study .................1007
Anna Maria Fiori

Clustering of Czech Household Incomes Over Very Short Time Period ..............................................................1015
Marie Forbelská, Jitka Bartošová

Model-Based Nonparametric Variance Estimation for Systematic Sampling. An Application in a Forest Survey ...........1023
Mario Francisco-Fernández, Jean Opsomer, Xiaoxi Li

Thresholding-Wavelet-Based Functional Estimation of Spatiotemporal Strong-Dependence in the Spectral Domain ......1031
María Pilar Frías, María Dolores Ruiz-Medina

Boolean Factor Analysis by the Expectation-Maximization Algorithm ...................................................... 1039
Alexander A. Frolov, Pavel Y. Polyakov, Dusan Hůšek

Modeling and Forecasting Electricity Prices and their Volatilities by Conditionally Heteroskedastic Seasonal Dynamic Factor Analysis .................................................................1047
Carolina García-Martos, Julio Rodríguez, María Jesús Sánchez

Consensus Analysis Through Modal Symbolic Objects ........1055
Jose M. García-Santesmases, M. Carmen Bravo

Nonlinear Regression Model of Copper Bromide Laser Generation ..........................................................1063
Snezhana Georgieva Gocheva-Ilieva, Iliycho Petkov Iliev

Random Forests Based Feature Selection for Decoding fMRI Data ..............................................................1071
Robin Genuer, Vincent Michel, Evelyn Eger, Bertrand Thirion
XXII Contents

Differentiation Tests for the Mean Shape and the Mean Vari-
ance of Renal Tumours appearing in early Childhood .........1079
Stefan Markus Giebel, Jens-Peter Schenk, Jang Schiltz

Local or Global Smoothing? A Bandwidth Selector for De-
pendent Data ..................................................1087
Francesco Giordano, Maria Lucia Parrella

Panel Data Models for Productivity Analysis .................1095
Luigi Grossi, Giorgio Gozzi

A Stochastic Gamma Diffusion Model with Threshold Parame-
ter. Computational Statistical Aspects and Application .1103
